Nancy Goroff is a Professor and Chair of the Chemistry Department at Stony Brook University, part of the State University of New York, where she has been on the faculty since 1997. Prof. Goroff's research focuses on making new and unusual carbon-rich molecules and materials, for electronics applications such as solar cells and LEDs. From 2013 to 2016, she served as Stony Brook's Associate Provost for the Integration of Research, Education, and Professional Development. In 2016, Prof. Goroff also served as Interim Dean of the Graduate School at Stony Brook.

Prof. Goroff grew up in the Chicago area. She got her bachelor's degree in Chemistry from Harvard University and her Ph.D. in Organic Chemistry from UCLA. She also carried out postdoctoral research with a National Science Foundation fellowship at Michigan State University, and then completed a postdoc in Chemical Education at the University of Michigan before coming to Stony Brook.
